

RITEEK SONAWANE

Data & Business Analyst · E-Commerce & Operations Analytics

riteek.s247@gmail.com | +91 9136233835 | Mumbai, India | [linkedin.com/in/riteek-sonawane](https://www.linkedin.com/in/riteek-sonawane)

PROFESSIONAL SUMMARY

Data & Business Analyst with 3+ years of experience **serving as the single point of ownership for all data across sales, inventory, and operations** in a fast-paced e-commerce environment. Built reporting infrastructure from scratch — SQL pipelines, Power BI dashboards, and Python automations — that replaced manual processes and put real-time insights in front of leadership. Known for translating messy operational data into decisions that moved the business: cutting order cancellations from **10% to 0.4%**, preventing **AED 200,000** in inventory losses, and automating reporting workflows that saved hours daily. Proficient in Python, SQL, and Power BI. Known for turning operational complexity into clear answers — often the first call when the business needed a number, a decision, or a room.

EXPERIENCE

E-Commerce Data & Business Analyst · PetCorner UAE | Dubai, UAE

Jan 2024 – Jun 2026

- Reduced marketplace order cancellation rate from **10% to 0.4%** through structured root-cause analysis and data-backed operational fixes — one of the highest-impact outcomes delivered
- Identified near-expiry inventory risks through aging analysis, driving targeted promotions that prevented AED **200,000** in potential stock losses
- Automated Talabat stock update process with a Python + SFTP script, cutting a **3-hour** manual twice-daily task down to minutes
- Automated Instashop inventory syncs across **15 stores**, replacing constant manual monitoring with single-click execution
- Built and maintained SQL-based reporting layer integrating multi-source data (marketplaces, inventory, order databases) across **15 stores** and **15+** aggregators — the central data foundation for the business
- Designed Power BI dashboards with DAX and Power Query covering order fulfillment rate, cancellation trends, inventory aging, and stock availability for management reporting
- Authored and maintained complex SQL queries (CTEs, joins, aggregations) to transform large operational datasets and serve as the on-demand reporting layer for all teams
- Conducted inventory aging and demand forecasting analysis, enabling channel-wise stock allocation that reduced capital lock-in and supported margin decisions
- Analyzed SKU distribution using sales velocity data to prevent over-purchasing and improve portfolio depth strategy
- Used performance analytics to support supplier negotiations and marketplace marketing investment by surfacing sales trends, margins, and ROI metrics
- Built and delivered a multi-year partner campaign analysis — revenue trends, promotion performance, and marketing ROI across product lines and aggregators — presented directly to the partner's board alongside the GM, resulting in a new offline marketing commitment
- Served as the primary data resource for owners, GM, and senior leadership — fielding on-demand analysis across product, shop, and aggregator performance; trusted to answer any business question backed by data
- Collaborated cross-functionally with operations, supply chain, and marketplace teams to ensure analytics output aligned with business targets

Backend Developer – Python / Django / REST APIs · Sankey Solutions | Mumbai, India Jul 2022 – Jan 2024

Backend development role focused on building scalable, secure APIs for enterprise applications in an Agile environment.

- Designed and developed production-grade REST APIs using Django Rest Framework (DRF) for enterprise applications, including a large-scale delivery for Tata Motors Limited
- Built scalable backend services and PostgreSQL data models supporting high-volume business workflows

- Improved system reliability through structured documentation, testing, and code review practices in Agile sprint workflows

PROJECTS

Olist E-Commerce — End-to-End Data Analysis *Python · PostgreSQL · Power BI · DAX · Star Schema*

- Processed and cleaned **99k+** order records using Python (Pandas); loaded structured data into PostgreSQL via pgAdmin
- Designed a star schema model with fact and dimension tables; built SQL views to streamline downstream analysis
- Built a Power BI dashboard with DAX measures covering order value, regional revenue, delivery performance, and Customer behaviour.

AdventureWorks Cycles — Business Intelligence Dashboard *Power BI · Power Query · DAX · Data Modeling*

- Built an end-to-end BI solution from raw data ingestion to executive-ready dashboards for a manufacturing dataset
- Designed a normalized star schema with clearly defined fact/dimension tables, managing filter flow and cardinality
- Authored advanced DAX measures including time intelligence patterns (YoY, MTD), iterator functions, and CALCULATE-based logic
- Delivered interactive reports with drill-through, KPI cards, slicer panels, and bookmarks tracking regional sales, product trends, and high-value customers

CORE SKILLS & COMPETENCIES

Analytics & BI: Power BI (DAX, Power Query, Data Modeling, Dashboard Design) · Excel (Advanced Formulas, Pivot Tables, Dashboards)

Data & Databases: SQL (Joins, CTEs, Subqueries, Aggregations, Views, Performance Tuning) · PostgreSQL · Data Validation & Quality Control

Data Modeling: Star Schema · Snowflake Schema · Fact & Dimension Table Design · Kimball Methodology

Automation & Engineering: Python (Pandas, Data Cleaning, Workflow Automation, SFTP) · REST API & JSON Data Extraction · Git

Domain Knowledge: E-Commerce Operations · Inventory & Warehouse Analytics · Marketplace KPI Reporting · Demand Forecasting · Multi-Source Data Integration

Communication: Executive Reporting · Cross-Functional Stakeholder Communication · Root Cause Analysis · On-Demand Reporting

EDUCATION

Bachelor of Science (B.Sc.) – Information Technology

SST College of Science, Mumbai, India

Graduated: Jul 2022
